Personal Statement

Motivated and detail-oriented **Junior Software Developer** with a strong foundation in web development, programming, and problem-solving. Passionate about building efficient, user-focused applications and continuously learning new technologies. Demonstrated teamwork and technical skills through academic and personal projects, including a scheduling and appointment management system and a commercial website for a wholesale business.

Education

University of Dundee — *BSc (Hons) Computing Science*
2025 – Present

- Modules include: Programming and Software Development, Web Technologies, Data Structures, and Human–Computer Interaction.

- Developing skills in software design, testing, and project collaboration.

International College Dundee (ICD) — *International Foundation in Computing*
2025 April – 2025 September

- Completed group projects including a Scheduling and Appointment Management System, focusing on backend logic and user interface design.

- Built teamwork, time management, and communication skills through collaborative development and presentations.

Key Projects

Wholesale Shop Website
Personal Project | 2025

- Designed and developed a fully functional e-commerce-style website for a local wholesale business.

- Implemented product listings, user registration, and contact forms using HTML, CSS, and JavaScript.

- Improved website usability and performance through responsive design and clean UI.

Technical Skills

- **Languages:** Python, Java, JavaScript, HTML, CSS
- **Frameworks & Tools:** React, Node.js, Git, Visual Studio Code
- **Databases:** MySQL, MongoDB
- **Other Skills:** API Integration, Responsive Web Design, Agile Methodologies

Transferable Skills

- **Teamwork**: Collaborated effectively in group projects at ICD, coordinating tasks and resolving conflicts to meet deadlines.
- **Problem-Solving**: Debugged issues in the appointment checking system, improving functionality through iterative testing.
- **Communication**: Presented project outcomes to tutors and peers, clearly explaining technical concepts.
- **Time Management**: Balanced multiple academic projects and personal website development, delivering all on schedule.

Interests

- Actively contribute to open-source projects on GitHub to enhance coding skills.
- Enjoy exploring new web development frameworks and tools to stay updated with industry trends.

Scheduling and Appointment System
Group Project, ICD | 2025

- Developed a web-based system for managing appointments and availability.

- Worked on the backend logic and helped design user interface components.

- Gained experience in teamwork, version control, and agile project coordination.
